
PRESS RELEASE

February 2009

Troy Diamond Report February 2009 now offers its monthly diamond price guides in 46 diamond weight classifications stated in total amount, and debuts a new Gold and Currency Report. Troy Diamond Report has shifted from per carat pricing to total pricing to provide a clearer perspective on diamond prices as diamond size increases. Any given "budget" is now quickly and easily communicated between qualities and amongst every size classifications. With an increased number of size classifications, it is no longer necessary to adjust pricing when a diamond's weight falls in the heavier range of outdated and too broad weight classifications. Troy Diamond Report offers 21 weight classifications under 1 carat, and weight classifications every 1/4 carat for diamonds from 1 carat up to 6 carat in size, and weight classifications every 1 carat, from 6 carats up to 10 carats in size.

Diamond Reports Offered:

1. **(USD):** Diamond's "Traditional Peg" the U.S. Dollar.
2. **(XAU):** "The Gold Standard" - Exchange to Gold in troy ounces stated in gold's annual moving average.
3. **(SDR):** "Paper Gold" - a weighted basket unit of the world's top 4 global currencies, specifically the International Monetary Fund's Special Drawing Rights and reserve asset.
4. **(EUR):** Euro of the European Union - the largest economy (27 member countries and increasing) and second largest currency (behind U.S. Dollar).
5. **(JPY):** Japanese Yen - the Third Largest Single Economy (after U.S. & China), and Second Most Technologically Powerful.
6. **(GBP):** U.K. Pound Sterling - a Global Trading Power, and International Financial Center.
7. **(RUB):** Russian Ruble - Producer of 25% by Value of World's Diamonds, and Geographically Largest Emerging Economy.
8. **(CAD):** Canadian Dollars -- Third Largest Diamond Producer (after Botswana & Russia), and a Resource Based Economy.

NEW! Troy Gold & Currency Report: monitors gold's intrinsic value trend and currencies stated in "Paper Gold." Gold historically has been used for thousands of years as a stable medium of exchange and recently as a Central Bank Reserve Asset. Follow Gold and Currencies stated in "Paper Gold" which is a weighted basket of the world's top 4 currencies (44% USD, 34% EUR, 11% JPY, 11% GBP), specifically the International Monetary Fund's Reserve Asset - "Special Drawing Rights." When gold or an individual currency is gaining or losing strength to this weighted basket, it is changing in a real sense. Eliminate errors when comparing one currency to another! Trends also graphically mapped from 1999 to present.

Subscription No Longer Required. Buy the \$24.95 monthly report best suited to you when you need it.

Sincerely,
