By having 46 weight classifications for round brilliant diamonds, from 1 point in size up to 10 carats, and 36 classifications for fancy shaped diamonds from 20 points in size up to 10 carats, Troy Diamond Report has shifted from traditional per carat pricing to *Total Pricing* to provide a clearer perspective on diamond values throughout size and quality classifications. Any given "budget" is now quickly and easily communicated between qualities and amongst every size classifications. With an increased number of size classifications, it is no longer necessary to adjust pricing when a diamond's weight falls in the heavier range of outdated and too broad weight classifications. Troy Diamond Reports monitor 21 weight classifications under 1 carat, and a weight classifications every 1/4 carat for diamonds from 1 carat up to 6 carat in size, and weight classifications every 1 carat, from 6 carats up to 10 carats in size.
